PREVENTING POTENTIAL COLOR WASH-OFF FROM COLORED MULCHES

To: Our Valued Customers
From: Ernie Miller, Vice President
Date: 3/11/03

Thank you for purchasing color enhanced mulch from Zeager Brothers, Inc.! In interest of ensuring your satisfaction with your purchase, we would like to point out a potential problem.

It is not uncommon to experience colorant washing from the colored mulch, especially during periods of heavy rain.

As with any other item that is being painted, the paint must have ample time to dry before it is no longer vulnerable to color wash-off during a rain storm. Please take this fact into consideration and do not install if there is not enough time for the material dry completely before the rain begins.

We regret any inconvenience this may cause in installation plans, but adhering to this method will help with overall product satisfaction.

If you have any further questions, please be free to contact me at 1-800-346-8524. We appreciate your business very much.
